JUNE 2010

Put this information in the glove box with the vehicle owner's manual.

## PARTS LIST

2 Ski attachments

4 Knobs

4 Short T-bolts (Not used)

4 Long T-bolts

4 Spacers

Key

## TOOLS REQUIRED

Flat-tip screwdriver

Shop towel

## INSTALLATION

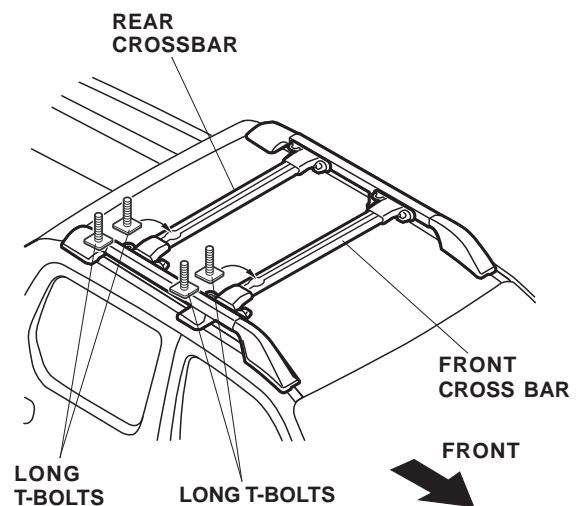

### NOTE:

- The ski attachments are designed to be used exclusively with a Honda roof rack, which is sold separately. If the vehicle is not equipped with a roof rack, install a roof rack before installing the ski attachment.
- The ski attachments may be installed either with both on the driver's side or with both on the passenger's side.

1. Remove the rubber moldings from the front and rear roof rack crossbars. Retain the rubber moldings to be reinstalled later.

2. Through the opening in the crossbar, slide two long T-bolts into each crossbar.

3. Insert the key, and turn it clockwise to unlock the front ski attachment. Press the button and open the top frame completely.

4. Position the spacers and the front ski attachment onto the long T-bolts, and install the two knobs. Tighten the knobs securely.

5. Repeat steps 5 and 6 to install a ski attachment to the rear crossbar.
6. Close the top frame, and listen for it to "click" into position, then turn the key counterclockwise to lock the top frame.

7. Rock the ski attachment in all directions to make sure it is installed securely. If necessary, retighten the T-bolts, or reinstall the ski attachment.
8. Tell the customer to write down the key number, and put the number in a safe place in case the key is lost or stolen.
9. To prevent excess wind noise, cut each rubber molding and install the cut pieces into the grooves in the crossbars.

### Loading Skis on the Attachment

1. Insert the key, and turn it clockwise to unlock the top frame. Push the button and raise the top frame completely.

2. Position the skis on the attachment:
  - Load with the rear of the skis facing forward and the bindings between the front and rear attachments.

- If the bindings cannot be positioned between the front and rear attachments, install the skis with one of the bindings positioned behind the rear attachment.

3. Close the top frame and listen for it to "click" into position. Depending on the thickness of the ski you may need to attach the hook in the second position.

4. Lock the top frame by turning the key counterclockwise. Remove the key.

5. With the ski attached, rock the attachment in all directions to make sure it is installed securely. Adjust as necessary.

Rock the ski attachment in all directions to make sure it is installed securely.
